

Provide energy saving tips

Analyse and explain your energy bills

Check existing levels of loft and cavity wall insulation

Is Your Home Energy Wise?

Review and explain heating and hot water settings

Explain the benefits of water saving devices

Check your doors, windows and letterbox for draughts

Want to **reduce your fuel bills**? Our **Climate Change Team** offers **free Home Energy Health Checks** to help you save energy and money in three easy steps?

Step one: Understanding your home's energy needs. We can help you to do this by providing an energy survey of your home - Just call **01902 556789** to arrange a home visit.

Step Two: A trained home energy expert will call at your home to complete a whole house energy survey.

Step Three: We can advise and support you to get the information and measures you need to help reduce your energy consumption and save you money in the process.

We can help with:

- Loft insulation
- Cavity wall insulation
- Pipe Lagging
- Draught proofing

- Energy saving tips
- Water saving kit
- Energy company / Tariff switching
- Debt advice
- Accessing 'Social Tariff' schemes
- How to use heating systems and appliances
- Reducing condensation and damp

Join our growing number of residents who have benefited from Home Energy visits and are enjoying warmer homes, lower bills, better health and reduced carbon (CO²) emissions.
